The 4th Industrial Revolution

Workshop

Speaker Bios

Prof Fiona Tregenna holds the DST/NRF South African Research Chair in Industrial Development, and is a Professor of Economics at the University of Johannesburg. She has a Ph.D. in Economics from the University of Cambridge, a Master's degree in Economics from the University of Massachusetts, and earlier degrees from the Universities of the Witwatersrand and Natal (now KwaZulu-Natal). Her primary research interest is in issues of structural change, deindustrialisation and industrial development. She has also published on poverty, inequality and unemployment. Fiona has received various awards for her research and is an elected member of the Academy of Science of South Africa (ASSAf). She is a part-time Member of the Competition Tribunal where she adjudicates competition cases, and serves on a number of boards and advisory panels and councils. She has previously worked for among others the National Labour and Economic Development Institute, the Congress of South African Trade Unions, universities in South African and abroad, and as a consultant to various research institutes and international organisations such as UNIDO, UNCTAD and the ILO.

Mr Chris Rooney is a Researcher at the Development Policy Research Unit (DPRU) at the University of Cape Town. Chris obtained his Business Science (Economics) and Masters in Applied Economics (Development stream) from the University of Cape Town. Chris is currently pursuing a degree in Data Science. His areas of interests include labour markets, structural transformation and behavioural economics. He has previously worked with organisations such as the Department of Labour, World Bank, United Nations Development Programme (UNDP), the African Development Bank, and the ILO.

Ms Safia Khan is a Researcher at the Development Policy Research Unit (DPRU) at the University of Cape Town. She has two Master's degrees in Economics (MCom - University of Cape Town), and Econometrics and Mathematical Economics (MSc - Tilburg University, Netherlands) respectively. Her area of interest surrounds labour markets, gender equality, and poverty reduction in African economies with a pro-poor, pro-development focus. Central to her work is policy and regulatory applicability. She is passionate about quantitative modelling as a tool used for evidence-based policy.
